STRIKEFORCE
Specializing In Preventing Identity Theft

FOR IMMEDIATE RELEASE:

StrikeForce Signs License Agreement with Intersections Inc. to Offer Anti-key logging Software

Edison, NJ (June 10th, 2008) – StrikeForce Technologies, Inc. (SKFT), a company that specializes in the prevention of Identity Theft, today announced that they have signed an agreement with Intersections Inc. (NASDAQ: INTX), a leading global provider of consumer and corporate identity risk management services. Intersections will be bundling StrikeForce's keyboard encryption and anti-key logging software, as a value add component into its premium identity theft protection service, IDENTITY GUARD® Total Protection.

"We are excited about our partnership with StrikeForce and our ability to provide consumers with an effective tool that will help protect them against key logging. We feel that the anti-key logging software is a valuable asset that will enhance our Total Protection product and provide consumers with the most proactive and comprehensive solution available in the marketplace today," says Michael Stanfield, Chief Executive Officer for Intersections.

IDENTITY GUARD® Total Protection takes a multi-layered approach to securing a customer's identity. It not only monitors and protects a consumers credit and personal data, but also provides 360-degree protection on the Internet, on PCs, or when traveling, 24 hours a day, 7 days a week. And now with the addition of StrikeForce's unique software, keystrokes will be encrypted providing for safer Internet transactions.

Mark Kay, CEO of StrikeForce says, "Identity theft is one of the fastest growing crimes in the world. A leading way to prevent this problem is through the use of a comprehensive identity theft monitoring service that incorporates keyboard encryption, creating a strong approach to protecting a person's identity. Quick action is required to prevent an all out attack on your identity. By managing your personal information carefully and sensibly, you can help mitigate your risk against identity theft."

StrikeForces's anti-key logging software is a unique software product that encrypts your user names, passwords, credit card accounts, and all your sensitive information when banking, shopping, emailing or browsing online. It utilizes a different approach that is preventative in nature and operates in real time. The software is a non-scan based technology that encrypts every keystroke between the keyboard and the Internet browser, helping to prevent your proprietary information from being stolen by key loggers in real time. According to the article, "The Mushrooming Menace of Keyloggers," in E-Commerce Times, May 2008 issue, the fastest-growing type of malware in 2006 was key loggers. The article also predicts that the total losses due to key loggers in America alone are estimated at $24.3 million.

"StrikeForce is very pleased to be working with Intersections, a leading provider of fully customized identity management solutions with sales to over 8 million consumers. Intersections is also recognized as the preferred partner for providing custom identity management solutions, with 8 out of the top 10 financial institutions counted among their many partners. They truly are cutting edge when it comes to delivering invaluable identity theft protection services," says Robert Denn President of StrikeForce Technologies.
